How does EnerSys Wi-IQ work?

in wireless technology. Installed directly on the battery harness, the Wi-iQ device communicates with remote sensors on the battery to capture and continuously share battery operating data via Bluetooth with all EnerSys battery op

What is EnerSys Wi-IQ battery monitoring system?

EnerSys introduces its Wi-iQ battery monitoring system which collects performance data for peak battery performance. The EnerSys Wi-iQ battery monitoring system helps you power your battery fleet more productively and profitably.

What is EnerSys Wi-IQ report?

EnerSys has developed its Wi-IQ Report, a customer reporting suite which enables you to keep on top of your battery fleet's performance. You can upload data from all your Wi-iQ devices and analyse a single battery or compile reports by battery/truck family to assess your utilisation.

How does the Wi-IQ device work?

Along with storing all battery operating data on the device itself, the Wi-iQ device wirelessly communicates with our Truck iQ(TM) smart battery dashboard, our E Connect mobile app, EnerSys's modular chargers and Xinx(TM) battery operations management system.

Why should you use Wi-IQ?

By detecting the early warning signs of battery abuse, the Wi-iQ device allows operators to correct potentially harmful practices. Plus, user-friendly Wi-iQ Reporting Suite software can generate battery operation and condition reports. Find out how we handle your data

What is EnerSys Wi-IQ?

EnerSys Wi-IQ has the ability to communicate wirelessly to download the battery key information for better diagnostics and service. The information Keeping your electric materials handling equipment on the move is fundamental to maintaining your business operating efficiently.

Leave all other date fields blank. 5.4.21 Owner - Leave as default - ENERSYS. 5.4.22 Battery Group - Enter truck type - Sit Down, Reach, etc., or as designated by customer. Page 8 5. Herzstück des EnerSys's Batteriemonitoring. Es zeichnet sich durch kompaktes Design für eine einfache Installation an der Batterieladeleitung aus und kombiniert Kompetenz im Batteriecontrolling mit modernster kabelloser Kommunikation. Der Wi-iQ Batteriecontroller ist mit einem LED-Display und

integrierten Alarmen ausgestattet.

At the core of EnerSys's power management, the Wi-iQ battery monitoring device combines our battery monitoring expertise with the latest in wireless technology. Installed directly on the battery harness, the Wi-iQ device communicates with remote sensors on the battery to capture and continuously share

The battery is fitted with a WiIQ onboard battery monitoring device. The WiIQ is suitable for a voltage range 24V - 80V. These devices capture battery operating data for later reporting and analysis whilst at the same time offer visual warnings to the operator on the current status of the battery - refer table below.

5.3.1.2 Interface with AGV using EnerSys proprietary CAN protocol. 5.4 Configuring Wi-iQ4 Device within Wi-iQ Reporting Suite 5.4.1 Once the device is installed, it must be set-up in the software. Plug a dongle (Wi-iQ antenna) into the USB port of a PC with the Wi-iQ Reporting Suite installed. Start Wi-iQ Report software.

EnerSys Wi-IQ Battery Monitoring Sheet - Free download as PDF File (.pdf), Text File (.txt) or read online for free. Improper charging and discharging can lead to reduced available battery capacity and more frequent battery replacements - costing your business time and money. The EnerSys's Wi-iQ(TM) Battery Monitoring Device monitors a range of battery operating data ...

Ottieni il massimo dalle tue batterie. Combinando la nostra esperienza nel monitoraggio della batteria con la pi#249; recente tecnologia wireless, il dispositivo di monitoraggio della batteria Wi-iQ monitora una serie di dati di funzionamento della batteria, tra cui ampere (AH) di carica/scarica, temperatura, tensione e livello dell'elettrolita (tramite un sensore esterno opzionale).
