Enough money has been invested into long-duration energy storage (LDES) technologies and projects over the past three years to result in 57GW of deployments. That's ...

A total 3.8GW/9.9GWh of energy storage was deployed in the US in the third quarter of 2024, according to Wood Mackenzie's US Energy Storage Monitor. 4-hour duration BESS in Australia's NEM to be more profitable, says report. December 13, 2024.

Emerging markets for storage will be on the rise in 2025, and Saudi Arabia will be in the forefront. Wood Mackenzie's new forecasts for battery storage capacity to be installed over the next decade will show Saudi Arabia leaping up the rankings to become one of the world's 10 largest markets.

3 &#0183; Wood Mackenzie's China utility-scale energy storage outlook is a 30+ page report containing charts, tables and graphs providing an in-depth analysis of the Chinese utility-scale energy storage market.

In 2018, demand for nickel-manganese-cobalt (NMC) batteries, used in both EVs and energy storage, outstripped supply. Demand for EV batteries is set to skyrocket over the next 10 years, with global planned capacity expansions expected to grow by more than 200% by 2026. Better energy storage growth will accelerate adoption of renewables

This regional report presents our latest 10-year energy storage outlook for Switzerland, which will be included in Wood Mackenzie's future energy storage market outlooks. Switzerland's energy storage market will expand 10-fold over the decade, reaching 2 GW / 3.8 GWh by 2033. Growth will be concentrated in the distributed segment, driving 97% ...

A report from energy research company Wood Mackenzie expects the technology to surpass 6GW of installed capacity by 2031. This article was first published on our sister site...

The plan proposes that by 2025 energy storage will enter the large-scale development stage, with system costs falling by more than 30% through improved technology performance. Since the plan was released, 12 provinces and cities have announced 2025 cumulative energy storage deployment targets, totaling around 40GW.

Seamlessly integrate Wood Mackenzie data into your own proprietary systems with Lens Direct API services. New Product Lens Metals & Mining ... Updates in the US energy storage market, with new deployment data from Q2 2024 and a five-year market outlook to 2028 for each segment. \$5,000.

Wood Mackenzie said that 103.8MW was front-of-meter, non-residential behind-the-meter (customer-sited) storage added up to 42.2MW while residential storage had another record quarter with 40.4MW installed in Q4 2019, doubling figures from Q4 2018.
