Reimagining Industrial Energy Use With Digital Technology Today, manufacturing accounts for 25 percent of
U.S. energy consumption and carbon emissions, and the industrial sector as a whole is the single largest
contributor to greenhouse gas emissions in the nation, at 30 percent. Changing how industry produces
materials and products is unquestionably critical to ...

"I think Estonia has a good opportunity to build a fully functional hydrogen-powered system with fuel
stations, bus infrastructure, and manufacturing," says Mossov. "Estonia is also a good area for promoting
energy from wind, which will allow us to get the hydrogen price point lower." The ones keeping Estonian
lights on and homes warm
