Rugged high torque electric drivelines (e-hubs) for agri-tech, construction, defence & more. | OxDrive e-hubs provide the speed, torque and durability needed for an exciting new generation of electric off-highway vehicles operating over extended periods in demanding environments. OxDrive e-hubs have been designed as an integrated solution.

In diesem Video erklären dir Herr Stadermann und Herr Wiebe, wie du die Drive-Funktion in Open-Xchange nutzt. Du lernst zudem, wie du „Aktuelle Aufgaben“ fin...

OxDrive e-hubs and GoFAR architecture have been used in an array of applications, from agritech through to press launch of concept cars. All applications have common themes in requiring robust, high torque electric drivelines, enabling the customer to build a mobile product or service. Our products are designed for robustness, and do not ...

Our e-hubs are simple to implement. A team of engineers this week were implementing upgrades to Performance Projects Ltd Gofar #robot platforms. Fitted with OxDrive e-hubs, they could focus on ...

OxDrive is EIS/SEIS approved, and we are currently in a late seed funding round to transition the e-hubs from low volume pre-production sales into initial volume production, develop our customer base, and further enhance product capability and range.

The Lincoln Institute for Agri-Food Technology (LIAT) is part of the University of Lincoln. It is home to a multi-disciplinary team of sector-leading expertise, including artificial intelligence, robotics, engineering, crop science, ...

The coolest thing in mobility since the horse. A Tesla is minutes away from you with OX Drive free-floating carsharing in Riga. Life with OX is meant to be simpler. You can rent a Tesla for a few ...

OxDrive specialises in the design and manufacture of robust, integrated, electric drives for off-highway use, including agritech, construction and more. The need for "one box" integrated units with gearbox, motor, motor controller and brake ...

OxDrive e-hubs have been designed as an integrated solution.

OxDrive E-hubs. Climate crisis and labour availability are driving huge change across industries, including agri-tech, construction & mining. Within agri-tech alone, the UK has a net zero deadline set for 2050, and a seasonal labour shortage of 10-25%. Automation and electrification play a key role in addressing these challenges.
